

Systematic Solutions

# SOLAR FREE-FIELD SYSTEMS ALUMERO LANDSCAPE & ALUCOMPACT

With **ALUMERO LANDSCAPE** and **ALUCOMPACT** Alumero offers two systems for installing photovoltaic modules in open spaces. Individual planning and maximum flexibility allow us to offer a variety of pedestal sizes and installation on many different types of terrain.

**ALUMERO LANDSCAPE** and **ALUCOMPACT** can be used to install all frameless and framed modules. Simple, functional components yield high cost savings in terms of both installation time and materials usage. High-end components made of aluminium and galvanised steel and stainless-steel fastening elements combine to make our systems corrosion-resistant and durable.

INNOVATIVE AND ECONOMICAL PHOTOVOLTAIC SYSTEMS

ALUMERO LANDSCAPE Module Bridge

ALUCompact Module Bridge

ALUMERO LANDSCAPE Module

## ALUMERO LANDSCAPE

- + No sealing of the soil surface
- + Individual module pedestal configuration
- + Quick assembly
- + Corrosion-resistant
- + Long service life due to high-end components
- + Easy terrain maintenance
- + Suitable for all framed and frameless modules
- + Fully recyclable
- + Optimal adaptation to the contours of the existing terrain

## ALUCompact

- + Always available
- + Ideal for concrete and screw foundations
- + For framed and frameless modules
- + Flexible pedestal configuration according to the customer's wishes
- + Easy terrain maintenance
- + Corrosion-resistant – long service life
